## KALTWASSERTUCH - The Surface Cloth

### Suitable for cleaning:

Windows, window frames, car paintwork and windscreens, glass, chrome, stainless steel, ceramic hobs, plastic, wood, natural stone, tiles, showers, kitchen and bathroom furniture, mirrors and sensitive surfaces.

### Before first use

Before using for the first time, rinse thoroughly with hot, clear water, wring out and allow to air dry.

### How to use

1. Rinse the cloth in clear, cold, lime-free water without detergent.
2. Wring out well and wipe surfaces with the cloth slightly damp.
3. For heavily soiled surfaces, clean with plenty of water, wring out and wipe again.
4. Do not rub dry - the streak-free result will appear automatically.

If streaks remain, the cloth was either too wet or too dry.

### After cleaning

After use, rinse in hot water without detergent and allow to air dry.

Only wash in the washing machine at 60–95 °C if cleaning performance decreases noticeably.

### Important care instructions

Rinse all detergent, soap and fabric softener residues thoroughly by hand.

Do not tumble dry - air dry only.

Always follow the care instructions of the surface manufacturer.

### Material

65 % polyester

35 % polyamide
